PROFILE

As a front-end developer, my passion lies in creating well designed and functional user interfaces that engage and capture users. I am proficient and enjoy working HTML, CSS, and JavaScript, to bring designs to life and enhance the user experience. I possess a strong understanding of web development principles and standards. And I am experienced in a variety of front-end frameworks and libraries such as React, Bootstrap. I am consistently up to date with the emerging trends and strive to learn new ways to improve my skills and knowledge and adhere to the best practices of the industry. I am a creative problem solver, and am skilled at working collaboratively with designers, product owners, other developers, and the wider team to tackle any problem efficiently. I possess strong communication skills and value clear and effective communication.

WORK EXPERIENCE

WEB DEVELOPER

Beautifect, London

09/2023-01/2024

- Assumed a pivotal role in the conceptualization and execution of responsive and user centric websites to cater to a diverse clientele.
- Collaborated closely with clients and project managers to comprehensively elucidate their requisites, subsequently translating them into precise technical specifications and functional solutions.
- Crafted website layouts, wireframes, and mock-ups that serve as necessary visual aids, enabling clients to gain a profound understanding of the website's aesthetic and functionality prior to the commencement of development.
- Proficiently employed front-end web development technologies, including HTML, CSS and JavaScript, to fabricate seamless and interactive user interfaces that enhance the overall experience.

Web Developer, Shopify Developer

Freelance, London

02/2023 - Current

- I have had the opportunity to work with various clients, delivering high-quality front-end development solutions.
- Here is an overview of my work experience:
- Collaborating directly with clients to understand their requirements and translate them into visually appealing and functional websites.
- Developing responsive and mobile-friendly user interfaces using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and adherence to web standards.
- Implementing front-end frameworks like Bootstrap or Tailwind CSS to streamline development and enhance the user experience.
- Integrating JavaScript libraries or frameworks such as React.js to create dynamic and interactive website components.
- Customizing content management systems (CMS) like WordPress or Shopify to provide clients with easy-to-use interfaces for content updates and management.
