## Front-end Developer

As a front-end developer, my passion lies in creating beautiful and functional user interfaces that engage and delight users. I love working with HTML, CSS, and JavaScript to bring designs to life and enhance the user experience. I have a strong understanding of web development principles and standards, as well as experience with a variety of front-end frameworks and libraries such as React, Bootstrap. I stay up to date with the latest trends and best practices in the industry, and am always looking for new ways to improve my skills and knowledge. In addition to my technical skills, I am also a creative problem solver who enjoys collaborating with designers, product owners, and other developers to find the best solutions for any given project. I am a strong communicator and value clear and effective communication throughout the development process. Overall, I am passionate about creating high-quality front-end experiences that are both visually stunning and highly functional, and I am excited to honing my skills as a front-end developer.

## WORK EXPERIENCE

---

### Zyber Ltd

#### Shopify Developer

- In part, my daily responsibilities involve ensuring that all parts of the website are completely functional, that products are correctly merchandised with corresponding prices. This included adding or removing products, tracking the customer journey and reviewing traffic (Shopify)
- Adding over 20,000 products and creating creatives and banners for up selling and bundles

## **Flood Maker**

### **Shopify Expert**

- Performed website and development for clients in diverse fields such as retail and educational material and entertainment.
- Developing strategic plans whilst liaising with clientele to design and develop high-grade websites on WordPress and Shopify.
- Generating online retail stores and restaurant portfolios with the benefit of Dropshipping for various chains across the UK

## **Smart Developers**

### **Web Designer**

- As a freelance Web Developer it was my duty to actively seek clients requiring web design services. I achieved this through advertising and also actively scanning websites that looked a little dated and offering my services. I would then meet with the client in person or via Skype or Phone, and discuss the project with them. I would then create a template for them to look at, and insert their content into that if they were happy with it.
